EmpraSan DPA-5

A VERSATILE PERACETIC ACID SANITISER, CLEANER AND ACIDIFIER

- Broad spectrum disinfectant effective at low temperatures
- Non-foaming and Non-tainting
- Easily degraded to harmless by-products
- Neither pits nor corrodes stainless steel
- Recommended for cluster dipping as well as final rinse for milking parlours and direct expansion bulk milk tanks

RECOMMENDED USAGE

USE	DILUTION	
General disinfection	0.5% through a pressure washer.	
Cluster dipping of dairy cattle	0.5% Change solution regularly as soiling takes place. Make up new solution every 24 hours.	
Milking parlours & direct expansion tanks	Final rinse up to 0.1%. There is no need to rinse after using DPA-5	
NOTE: NOT TO BE USED AS A TEAT DIPPING OR SPRAY SOLUTION		

Dosage	Dilution rate	Millilitres / 10 litres	ppm Peracetic acid
0.5	1:200	50	250
0.1	1:1000	10	50

Caustic residues from pre-cleaning should be removed to avoid loss of efficacy. Avoid contact with mild steel or galvanised equipment or utensils and soft metals such as brass and copper. Aluminium alloys are not attacked by dilute working solutions. Peracetic acid may affect certain types of rubber when used over a long period of time.

Storage:Store in original container in a cool, dark, well ventilated place away from alkalis. Keep lid firmly attached.Pack Size:25, 200 & 1000kgShelf Life:I year from date of manufacture. Use within 3 months of opening.
